arman.tsatryan.7@gmail.com

PROFESSIONAL PROFILE

- Analyzed business data (sales, customers, orders, marketing) and translated insights into actionable management decisions for B2B and B2C operations.
- Built RFM segmentation, ABC/XYZ analysis, and customer clustering (including LTV evaluation, repeat purchases, and churn analysis).
- Conducted quantitative customer research and identified key service selection factors using QFD and Kano models.
- Analyzed the customer acquisition and product usage funnel, identifying bottlenecks and losses.
- Performed demand and volume forecasting, including seasonality, regression analysis, and moving averages.
- Generated marketing analytics: channel segmentation, performance analysis, and growth hypotheses.
- Participated in CRM design: segments, custom fields, business processes, and triggers.
- Build AI-assisted analytical workflows using Claude Code and LLMs for business analytics.
- Transform business requests into measurable analytical goals.
- Perform AI-assisted Exploratory Data Analysis (EDA), hypothesis generation, data validation, and insight verification.
- Configure and use Model Context Protocol (MCP) to connect AI assistants with files, databases, and analytical tools.
- Apply AI to automate repetitive analytical tasks while validating results through structured verification checklists.
- Develop AI-powered BI agents that retrieve metric definitions before generating SQL queries or analytical answers.

WORK EXPERIENCE

CIO Group LLC (CIO Logistics, CIO Postal) | Yerevan
Head of Marketing Department | Oct 2023 — Present

- Managed the full marketing cycle: from data analysis and goal setting to strategy development, tactical execution, and performance monitoring.
